You can easily obtain the same charming artistic results on your own place with the beautiful Evergreens in this collection.

The stunning Douglas Golden Arbor Vitaes and conical Siberian Arbor Vitaes should be placed in front. Their colorings are best displayed against the darker green of the American Arbor Vitaes, Pyramidal Arbor Vitaes and the Red Cedars.

COLLECTION "J" \$150

An Evergreen garden is refreshingly green and lovely the year around. Instead of the bed of tender plants which must be changed or replaced each season, the Evergreen garden is permanent and will last for many years. Changes in this design may be made to suit your individual taste. Rustic benches, bird baths, and a sun dial may be added.

Interesting variations in habit of growth and foliage formation of the trees are the features of this collection. In forceful contrast to the tall, sturdy Douglas Fir is the dwarf Juniper Canadensis and the low-creeping Juniperus Horizontalis. Graceful Hemlocks and the beautiful Blue Juniper Glauca are among its choicest components. These Evergreens will add an air of coziness, hospitality and distinction about your home which can be gained in no other way.

4 Red Cedars	5 to 6	feet B&B
2 Douglas Firs	3 to 4	feet B&B

The D. Hill Nursery Co., Dundee, Ill.

Gentlemen:—We are more than pleased to advise you that the Evergreen trees which we purchased from you last spring were received by us in excellent condition and have all grown wonderfully this summer. We did not lose a single tree. They are the only kind of trees we will ever plant as they are beautiful summer and winter. There is scarcely a day some one does not favorably comment on how tasty and artistic my Evergreens look. I am simply delighted with them. We expect to carry out further planting next spring and will be only too glad to send you our order.

Yours respectfully,

Mr. and Mrs. H. S. Haze.
